

UX Design Storyboard

Scenario: Jadi Budi disini memakai aplikasi ini sebagai ide utama dia untuk mencari tempat makan recommended di daerah kawasan Bintaro

budi wants to eat but he doesn't know where to eat at Bintaro

he remember that there's app for information about food at Bintaro

budi open the app and searching. He found cheap and good restaurant nearby him

budi goes to the restaurant in question

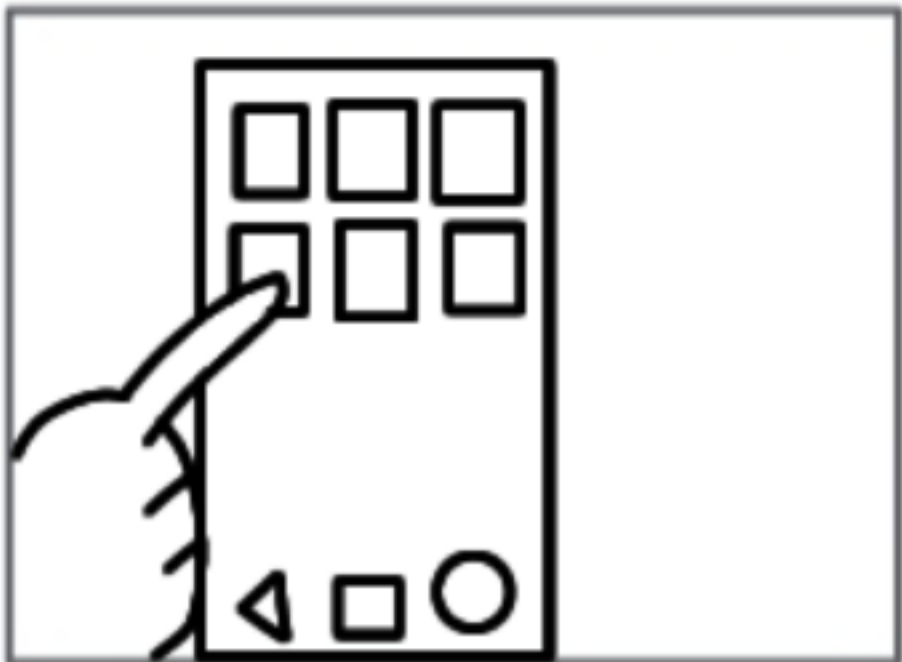

he order the food that he wanted

finally he gets the food he wants

UX Design Storyboard

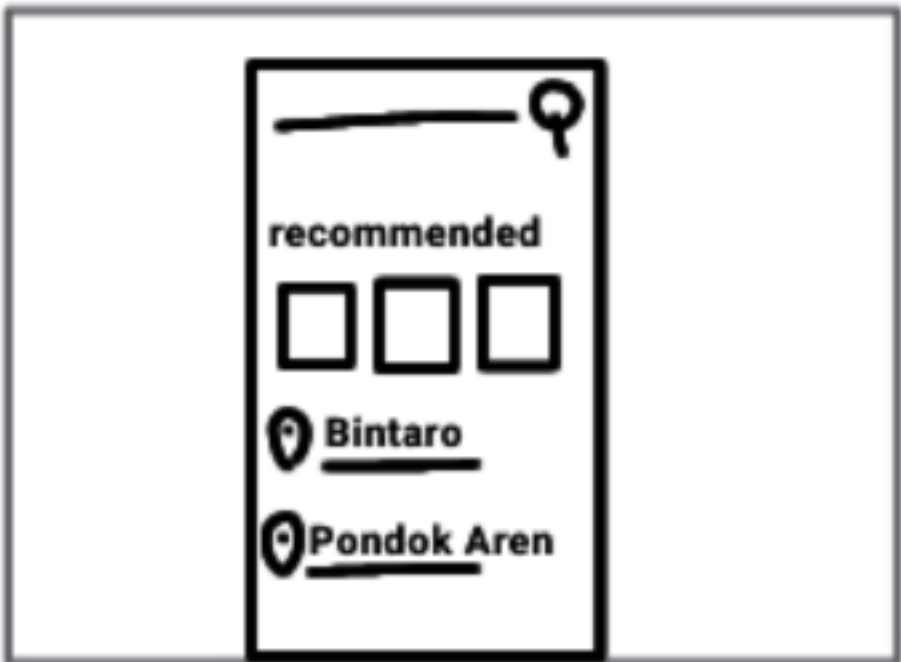

Scenario: an app allow user searching for food or restaurant by categories (cheap, 5 star, location nearby user)

user open the app

user can choose between login or guest account

this is the front screen display of the app

user can search by categories (ex: food)

user can choose the food their want

user can see the detail about food description and location
